AUGUST UNIFORM PRICE \$3.53

A uniform price of \$3.53 per cwt. was computed for 3.5% milk delivered by producers to handlers subject to the pooling provisions of the Fort Wayne Milk Order. For milk of a higher or lower test this price will be adjusted by a butter-fat differential of 6.7 cents for each one-tenth of one percent that individual tests vary above or below the 3.5% standard. This minimum price is subject to the applicable marketing service deduction and authorized hauling charges. The computation of this blend price is shown on page 4 and the class prices on page 3.

The \$3.53 price for August 1958 is 24 cents below the August price of a year ago. It is the same as the July 1958 price.

PRODUCTION AND UTILIZATION

Dairy farmers shipped 9.1 million pounds of pooled milk to the Fort Wayne market during August 1958. This is 0.2 million pounds or 2.5% more milk than a year ago. 4.9 million pounds; 54% of the total pooled milk production, was utilized as Class I milk (fluid milk and cream products) by the Fort Wayne handlers. This percentage was 52% last month and 57% a year ago.

Average production per farm per day was 338 pounds for August 1958 as compared with 312 pounds a year ago. Producers on the market for August 1958 numbered 872, which is 47 less than a year ago. Other market statistics will be found on pages 2 and 3.
